

## **Section 11.0 Construction Sanitary**

### **11.1 Construction Office Camp**

Several construction office trailers will be placed on the property near the lay down yard. These trailers will be temporary facilities which may be on site for 24 months during the construction and initial operations period. The trailer camp will obtain a sanitary drain field permit from Carbon County for any sanitary facilities associated with the temporary construction office camp.

### **11.2 Construction Site**

A local regional vendor will be contracted to supply portable chemical toilets (port-a-potty) for use in the project area. Then primary plant general contractor will be required to provide portable toilets throughout the project area for construction crews.

### **11.3 Operations and Maintenance Facility**

Mud Springs LLC anticipates purchasing an existing building in the area for its operations office. If a suitable building is not located in the general area or the City of Bridger, Mud Springs LLC will make a separate application for a sanitary permit for the Operations and Maintenance Facility.
