

## Section 4.0 Site Plans

The following figures contain the general information regarding the existing conditions and the Assignee's alternative planned facilities for Mud Springs Wind Project.

Figure 1: Assignee's Alternative Project Layout Map including WTG, roads collector lines, collector substation and Assignee's three different interconnection options.

Figure 2: Mud Springs WTG Layout Comparison Map showing the existing 69 WTG layout and the Assignee's alternative 119 WTG layout.

Figure 3: Adjacent Property Owners Map shows the owners of Carbon County properties adjacent to the property boundaries.

Figure 4: Assignee WTG 1000 ft Setback Map identifies the WTG that are located within 1,000 feet for the Project boundary.

Figure 5: Assignee Sound Modeling Map shows the areas that would be impacted by Project sound impacts that are 50 decibels or higher based upon preliminary sound modeling results of the Assignee's Project layout.
