<b>Analysis:</b>	No. The total Unexplained Difference is not at least 5 votes. The audit of this precinct for this contest is complete.
Is the Unexplained Difference total in Column H at least 5 votes? If so, continue below. If not, stop here.	Since the Unexplained Difference total is not at least 5 votes, it is not necessary to calculate the percentage difference.
What is the Percentage (%) Difference Between Hand Counted Ballots and the Unexplained Difference (the Column H Total Votes Divided by the Column B Total Votes)?	The Unexplained Difference percentage is not calculated since the total is not at least 5 votes. The audit of this precinct for this contest is complete.
Is the Unexplained Difference total at least 5 votes and is the Unexplained Difference greater than 0.5%? If not, then the total is Acceptable. If the percentage is greater than .5%, then the Unexplained Difference is Not Acceptable and county must audit three additional precincts and examine the machine(s).	The Unexplained Difference percentage is not calculated since the total is not at least 5 votes. The audit of this precinct for this contest is complete.

\*\* The random-sample audit may not include a ballot that a vote-counting machine was unable to process and that was not resolved pursuant to 13-15-206 because the ballot: (a) appeared to have at least one overvote; (b) appeared to be blank; (c) was in a condition that prevented its processing by a vote-counting machine, or (d) contained a mark, error, or omission that prevented its processing by a vote-counting machine.

†Note: The purpose of the post-election audit is to determine whether the tabulating equipment has accurately counted votes. Because the purpose of the post election audit is to determine if the machine counted the votes correctly, the audit committee should be instructed to count votes consistent with the way an optical scan machine would count votes.

**Analysis:**

Is the Unexplained Difference total in Column H at least 5 votes? If so, continue below. If not, stop here.	No. The total Unexplained Difference is not at least 5 votes. The audit of this precinct for this contest is complete.
What is the Percentage (%) Difference Between Hand Counted Ballots and the Unexplained Difference (the Column H Total Votes Divided by the Column B Total Votes)?	Since the Unexplained Difference total is not at least 5 votes, it is not necessary to calculate the percentage difference.
Is the Unexplained Difference total at least 5 votes and is the Unexplained Difference greater than 0.5%? If not, then the total is Acceptable. If the percentage is greater than .5%, then the Unexplained Difference is Not Acceptable and county must audit three additional precincts and examine the machine(s).	The Unexplained Difference percentage is not calculated since the total is not at least 5 votes. The audit of this precinct for this contest is complete.

\*\* The random-sample audit may not include a ballot that a vote-counting machine was unable to process and that was not resolved pursuant to 13-15-206 because the ballot: (a) appeared to have at least one overvote; (b) appeared to be blank; (c) was in a condition that prevented its processing by a vote-counting machine; or (d) contained a mark, error, or omission that prevented its processing by a vote-counting machine.

†Note: The purpose of the post-election audit is to determine whether the tabulating equipment has accurately counted votes. Because the purpose of the post election audit is to determine if the machine counted the votes correctly, the audit committee should be instructed to count votes consistent with the way an optical scan machine would count votes.
